

BAF-11302/29  
10207sh

1. A method of treating disc herniation or degenerative disc disease,  
2 including the step of:  
injecting tissue growth factors or differentiation factors into the spinal canal or  
4 disc as part of the treatment procedure.

2. The method of claim 1, including the step of:  
2 concentrating and releasing the growth or differentiation factors from a patient's  
blood.

3. The method of claim 1, including the step of:  
2 obtaining the growth or differentiation factors from recombinant genetic  
techniques or animal sources.

4. The method of claim 1, including the step of selecting the growth and  
2 differentiation factors from the following list:

- TGF- $\alpha$ , - $\beta$ 1, -2; EGF, IGF-I; PDGF; FGF; IL-I, -1a, -1b, -2, -3, -4, -5, -6, ... n;  
4 BMP-1, -2, -3, -4, -5, -6, -7, -8, -8B, -9, -12, -13, ... n; VEGF; and recombinant forms  
thereof.
